Skills

Programming	R, Python, SQL, Perl, bash, Shiny, RMarkdown, knitr, Jupyter
ETL tools	Data transformations (dplyr, pandas, Dataflow, Dataprep), warehousing (Snowflake, Redshift, MongoDB), managed Hadoop/Spark services (Dataproc, EMR), job orchestration and monitoring (Cloud Composer, MWAA), messaging (Pub/Sub, SNS/SQS)
Other technologies	Data Studio, Tableau, Jira, Confluence, Git, Unix/Linux environments, REDCap Working knowledge of Docker, Kubernetes

Professional Experience

Senior Bioinformatics Scientist , RTI International, Research Triangle Park, NC	Jun 2015 - present
<ul style="list-style-type: none">Supervise multiple teams of analysts and developers as program manager and technical task leadDesign and build extract, transform & load (ETL) pipelines on AWS & GCP to ingest and warehouse dataUse R to implement data transformations (dplyr, tidyr) and to create novel visualizations (ggplot)Utilize Snowpipe to ingest Twitter JSON data into SnowflakeCreate intermediate tables from raw data to support ad-hoc analyses and reportingDesign and create tools and pipelines to support analytics needs and facilitate analysis and insightsInterface with technical and non-technical stakeholders to resolve complex business and technical issues	
Data Engineer (Consultant) , Animal Cancer DX, LLC, Raleigh, NC	Jun 2021 - present
<ul style="list-style-type: none">Designed and created an ETL pipeline to aggregate and stage experimental data on S3, ingest data into Redshift; application hosted on EC2 automatically generates and distributes reports with statistical analyses to stakeholdersDesigned and created a Shiny application to be hosted in a Docker containerDesigned and built data browser dashboard using Shiny and ggplot	
Bioinformatics Data Scientist , Johns Hopkins Medical Institutions, Baltimore, MD	Aug 2013 - Jun 2015
<ul style="list-style-type: none">Completed 2-year data mining project in 10 weeks using R, SQL, and bashDesigned and created an ETL batch process to ingest and analyze public health datasetsUsed Python to implement data transformations (pandas) and create novel visualizations (matplotlib, ggplot)Designed and implemented analysis pipelines for large genomic datasets for exploratory analysis and publicationEstablished unsupervised machine learning methods into quality control process	
Bioinformatics Analyst , Johns Hopkins Medical Institutions, Baltimore, MD	Oct 2011 - Aug 2013
<ul style="list-style-type: none">Designed and created an ETL pipeline to ingest and transform public health data sources for analytic use, increasing the efficiency by 700% over the legacy workflow	
Bioinformatics Researcher , Putonti Lab, Loyola University, Chicago, IL	Jan 2010 - Jan 2011
<ul style="list-style-type: none">Created pipeline to aggregate and analyze genomic data extracted from NCBI repository	

Education

Johns Hopkins University M.Sc. Bioinformatics	Baltimore, MD Aug 2013
Loyola University B.Sc. Bioinformatics	Chicago, IL May 2011
